

**East of England
Citizens' Senate**

Citizens' Senate meeting no 41

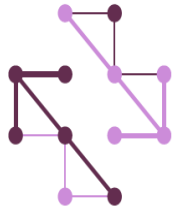

14th March 2023

Kevin Minier

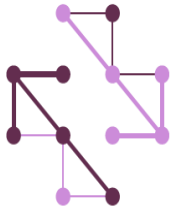

Extend the Patient Voice

- **Involvement in programmes, services, policy & research**
- **Access to specialist Health Professionals and speakers**
- **Information and guidance on NHS policy and service change**
- **Support innovation for patient benefit**
- **Training and development opportunities**

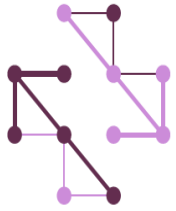

The Aims of the Citizens' Senate

- **To represent the public voice on the Clinical Senate**
- **To connect the Public Voice locally, regionally, and nationally via NHS programmes, the Academic Health Science Networks, and other organisations**
- **To be the public 'guiding conscience' for strategic/major healthcare decisions across the region.**

The Added Value of the Citizens' Senate

- **Access to a diverse network of lived experience**
- **Trained in co-production principles and involved in integrated programmes, service change, policy & research**
- **Supporting innovation for personalised care and patient outcomes**
- **Developed and delivered PPI/Co-production Strategies, Teams and Facilitation**
- **Access to a wide community of service providers, locally, regionally and nationally**

MSE Adults & Older Adults MH Plan

Moving from policy, theory and ideas to practicable
delivery on the ground.

October 2022

www.midandsouthessex.ics.nhs.uk

Objectives for today:

- Share the new Model of Care
- Highlight the value of partnership working (GPs/PCNs etc)
- Demonstrate a personalised approach i.e. one size doesn't fit all and giving patients choice and control on what matters to them
- Share the early benefits and evidence.

"I've been fighting for the last 5 weeks... I phoned Grays Hall and I was told that I would have a phone call on the Wednesday, I had nothing, absolutely nothing."

"I receive a letter, from Western house that has been here there and everywhere, I open it a month later, to find that they have all my personal details to my address to my telephone number incorrect..."

Ending the MH Ping Pong

In the Beginning...

- Unhappy GPs and even unhappier patients being pushed from pillar to post,
- Inefficient ways of working leading to waste of resources,
- Ineffective communication processes and siloed working,
- High DNA rates,
- Long waiting times,
- Fitting needs into services,
- Large Outpatients caseloads held by psychiatrists with little therapeutic intervention,
- Fragmented and inadequate community support.

Access to Health and Social Care Services

Core20PLUS5

Adults, Children and Young People

Core20PLUS5 Adults

REDUCING HEALTHCARE INEQUALITIES

The Core20PLUS5 approach is designed to support Integrated Care Systems to drive targeted action in healthcare inequalities improvement

CORE20
The most deprived 20% of the national population as identified by the Index of Multiple Deprivation

PLUS
ICS-chosen population groups experiencing poorer-than-average health access, experience and/or outcomes, who may not be captured within the Core20 alone and would benefit from a tailored healthcare approach e.g. inclusion health groups

Target population

CORE20 PLUS 5

Key clinical areas of health inequalities

1

MATERNITY
ensuring continuity of care for women from Black, Asian and minority ethnic communities and from the most deprived groups

2

SEVERE MENTAL ILLNESS (SMI)
ensuring annual health checks for 60% of those living with SMI (bringing SMI in line with the success seen in Learning Disabilities)

3

CHRONIC RESPIRATORY DISEASE
a clear focus on Chronic Obstructive Pulmonary Disease (COPD), driving up uptake of Covid, Flu and Pneumonia vaccines to reduce infective exacerbations and emergency hospital admissions due to those exacerbations

4

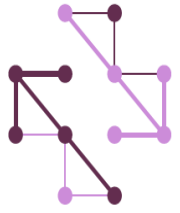

EARLY CANCER DIAGNOSIS
75% of cases diagnosed at stage 1 or 2 by 2028

5

HYPERTENSION CASE-FINDING
and optimal management and lipid optimal management

SMOKING CESSATION
positively impacts all 5 key clinical areas

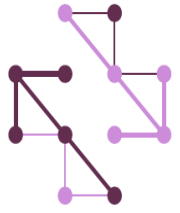

Core20 IMD

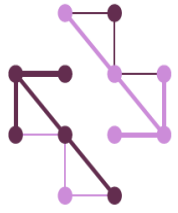

The most deprived 20% of the national population as identified by the national [Index of Multiple Deprivation \(IMD\)](#). The IMD has seven domains with indicators accounting for a wide range of social determinants of health.

PLUS

Populations we would expect to see identified are ethnic minority communities; people with a learning disability and autistic people; people with multiple long-term health conditions; other groups that share protected characteristics as defined by the Equality Act 2010; groups experiencing social exclusion, known as inclusion health groups coastal communities (where there may be small areas of high deprivation hidden amongst relative affluence).

Inclusion health groups include: people experiencing homelessness, drug and alcohol dependence, vulnerable migrants, Gypsy, Roma and Traveller communities, sex workers, people in contact with the justice system, victims of modern slavery and other socially excluded groups.

5

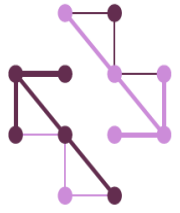

There are five clinical areas of focus which require accelerated improvement.

Governance for these five focus areas sits with national programmes; national and regional teams coordinate activity across local systems to achieve national aims.

Five for Adults:

1. Maternity

Ensuring continuity of care for women from Black, Asian and minority ethnic communities and from the most deprived groups. This model of care requires appropriate staffing levels to be implemented safely.

Five for Adults:

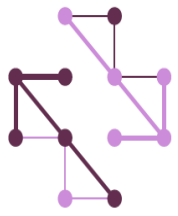

2. Severe mental illness (SMI)

Ensuring annual health checks for 60% of those living with SMI (bringing SMI in line with the success seen in learning disabilities).

Five for Adults:

3. Chronic respiratory disease

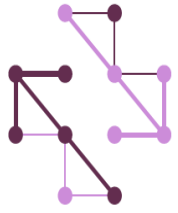

A clear focus on Chronic Obstructive Pulmonary Disease (COPD) driving up uptake of COVID, flu and pneumonia vaccines to reduce infective exacerbations and emergency hospital admissions due to those exacerbations.

Five for Adults:

4. Early cancer diagnosis

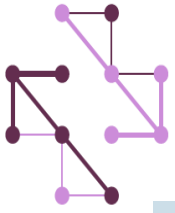

75% of cases diagnosed at stage 1 or 2 by 2028.

Five for Adults:

5. Hypertension case-finding and optimal management and lipid optimal management

To allow for interventions to optimise blood pressure and minimise the risk of myocardial infarction and stroke.

Core20PLUS5 Children & Young People

REDUCING HEALTHCARE INEQUALITIES FOR CHILDREN AND YOUNG PEOPLE

CORE20

The most deprived 20% of the national population as identified by the Index of Multiple Deprivation

The Core20PLUS5 approach is designed to support Integrated Care Systems to drive targeted action in healthcare inequalities improvement

PLUS

ICS-chosen population groups experiencing poorer-than-average health access, experience and/or outcomes, who may not be captured within the Core20 alone and would benefit from a tailored healthcare approach e.g. inclusion health groups

Target population

CORE20 PLUS 5

Key clinical areas of health inequalities

1

ASTHMA

Address over reliance on reliever medications and decrease the number of asthma attacks

2

DIABETES

Increase access to Real-time Continuous Glucose Monitors and insulin pumps in the most deprived quintiles and from ethnic minority backgrounds & increase proportion of children and young people with Type 2 diabetes receiving annual health checks

3

EPILEPSY

Increase access to epilepsy specialist nurses and ensure access in the first year of care for those with a learning disability or autism

4

ORAL HEALTH

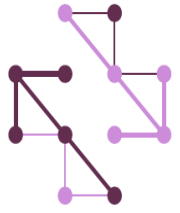

Address the backlog for tooth extractions in hospital for under 10s

5

MENTAL HEALTH

Improve access rates to children and young people's mental health services for 0-17 year olds, for certain ethnic groups, age, gender and deprivation

Five for Children and Young People:

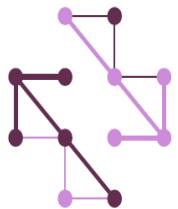

1. Asthma

Address over reliance on reliever medications;
and Decrease the number of asthma attacks.

2. Diabetes

Increase access to real-time continuous glucose monitors and insulin pumps across the most deprived quintiles and from ethnic minority backgrounds; and

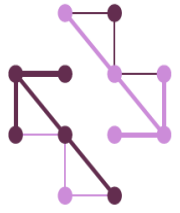

Increase proportion of those with Type 2 diabetes receiving recommended NICE care processes.

Five for Children and Young People:

3. Epilepsy

Increase access to epilepsy specialist nurses and ensure access in the first year of care for those with a learning disability or autism.

Five for Children and Young People:

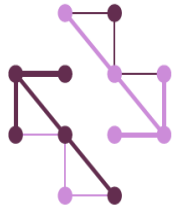

4. Oral health

Tooth extractions due to decay for children admitted as inpatients in hospital, aged 10 years and under.

Five for Children and Young People:

5. Mental health

Improve access rates to children and young people's mental health services for 0-17 year olds, for certain ethnic groups, age, gender and deprivation.
